

FENCING COMPETITION
TOKYO OLYMPIC GAMES

OLYMPIC GAMES REPLACEMENT PROCEDURES FOR TEAM EVENTS

The teams will have the possibility of replacing one fencer in the four following cases:

- 1) for injury
- 2) for COVID-19 positive case according to the Playbook
- 3) for tactical reasons
- 4) when a team member has been sanctioned with a P-black card

Once a replacement has been made for any of the above reasons, no further replacements may be made for any reason whatsoever.

1) Process for accreditation of replacement athletes

NOCs may name a replacement athlete for each team event for which they are qualified. NOCs who are entitled to a replacement athlete must submit to Tokyo 2020 an Application for Accreditation form for each replacement athlete, which must be received according to the deadline established by Tokyo 2020, with a copy also being passed to the FIE.

Replacement athletes will receive an Accreditation Card in the "Ap" category as P Alternate Athletes, providing access to Fencing Training and Competition Venue only.

By Tokyo 2020 Entry by Name deadline (5 July, 2021), NOCs must confirm all athletes to fill their qualified positions, and also nominate the replacement athletes to which they are entitled for team events.

Venue Access

P Alternate athletes accredited as a "Ap" category have access to the training and competition venue(s) of a single sport only (Fencing).

During the match, P alternate athletes are in their national team box.

P Alternates athletes take part to the presentation of the team.

2) Replacement due to injury

The circumstances under which a team member may be replaced for injury are described in *The FIE Rules for Competitions*, Book 2, Organisation Rules, Article o.99.6

The following describes the special rules for the substitution of athletes injured in the Team Events of Olympic Games, Tokyo 2020

An injured athlete may be replaced either by an already accredited athlete or a replacement athlete duly appointed by his/her NOC under the process outlined in 1) above. The replacement will be made through the following process which will be managed by the FIE:

- a) *Verification of the accredited athlete's injury:* At the venue, the FIE Medical Delegate(s) personally and physically examine the athlete after the injury, before the athlete leaves the venue. At least one medical officer must be present constantly at the venue during the competition to be able to perform this task in a timely fashion.

Away from the venue, a report signed by the medical officer responsible for the site where the injury happened (e.g. training site or village) must be submitted by the team captain to the FIE Medical Delegate(s) as soon as possible after the incident.

After carefully verifying the type and extent of the injury, the FIE Medical Delegate(s) decide whether the injury justifies the withdrawal of the fencer from the team event. The team captain completes the Team Substitution form and one or both of the FIE medical delegates sign the medical confirmation part of the form.

The determination of injury by the FIE Medical Delegate(s) will be final. There shall be no right of appeal against this decision.

- b) The replacement athlete is present in the team box and ready to fence without delaying the team event.
- c) The team captain submits a Team Substitution form to the Technical Directorate as well. This form is then passed to the results staff. Once this notification to the results staff has taken place, the competition shall proceed from the point at which the injury took place.
- d) Only one replacement per team is authorised throughout the competition. A competitor who is replaced cannot again take his/her place in the team either during the same match or the rest of the competition.

3) Replacement of a fencer positive to COVID-19 according to Playbook

The information must be received in writing by the **FIE COVID-19 Liaison Officer (CLO) and the FIE Medical delegate** the day before each team event at the latest at 4 pm. The CLO and the FIE Medical delegate inform the Technical Directorate immediately.

In this case, the team captain completes a Team Substitution form and submits it to the Technical Directorate.

Only one replacement per team is authorised throughout the competition. A competitor who is replaced cannot again take his/her place in the team either during the same match or the rest of the competition.

4) Replacement for tactical reasons.

The circumstances under which a team member may be replaced for tactical reasons are described within *The FIE Rules for Competitions*, Book 2, Organisation Rules, Article o.99.5

The replacement for tactical reasons can intervene either before the beginning of a match or during the match.

In the Olympic Games, a competitor who is replaced cannot be replaced again in the team either during the same match or the rest of the competition.

5) Replacement in case of P-black card

Replacement in case a team member has been sanctioned with P-black card, and the circumstances under which a team member can be replaced are described within the FIE Rules for Competitions, Book 1, Technical rules, article t. 124.

The following special rules will apply for the Tokyo 2020 Olympic Games and take precedence over the above rules where specified.

The replacement of the team athlete who was sanctioned by the P-black card can be made immediately during a relay of the team match.

A competitor who is replaced following a P-black card cannot again take his place in the team either during the same match or the rest of the competition.

6) Replacement procedure for 4) tactical reasons and 5) P-black card

An athlete could be replaced by a replacement athlete duly appointed by his/her NOC under the process outlined in 1) above. The replacement will be made through the following process which will be managed by the FIE:

Before the replacement, the team captain informs the Technical Directorate and provides proof that the replacement fencer is ready to fence without causing any delay in the competition.

In this case, the team captain completes a Team Substitution form and submits it to the Technical Directorate.

This form is then passed to the results staff prior to the commencement of the bout. The Technical Directorate must inform the team captain of the opposing team and the referee of the match about the replacement.

FENCING COMPETITION
TOKYO OLYMPIC GAMES

FORMULA, PLACEMENT AND DRAWING OF LOTS

Individual Events

All events will be fenced in a direct elimination format throughout.

Individual competitions at Tokyo 2020 will comprise approximately 34 to 36 fencers per weapon and will be run as an incomplete direct elimination table of 64.

The initial order of fencers will be established according to the latest FIE Official Ranking (www.fie.org/results-statistic/ranking). If there are fencers qualified who do not appear in the FIE Official Ranking, and/or if there are fencers equally ranked in the FIE Official Ranking, the FIE will carry out a preliminary drawing of lots as follows:

- First, a drawing of lots will be carried out for any fencers equally ranked
- Then, a drawing of lots will be carried out for any fencers who do not appear in the FIE Official Ranking

Once all fencers have an initial ranking, there will be a drawing of lots in pairs for all fencers in the table.

The individual events will be run by direct elimination throughout and the bout for third place will be fenced.

Team Events

All teams are composed of three fencers and there can be a P alternate athlete. Teams will be seeded according to the FIE Official Team Ranking at each weapon. Where teams are equally ranked, a drawing of lots will be carried out.

Teams will be placed in a complete direct elimination table of 8 or an incomplete direct elimination table of 16, depending on the number of teams participating in the event.

The teams will retain their initial ranking without a drawing of lots. If there is a host country team, it will be placed in the direct elimination tableau according to its place in the latest FIE Official Team Ranking in the weapon concerned.

All team events will be run by direct elimination format throughout. Places five to eight will be fenced.

FENCING COMPETITION TOKYO OLYMPIC GAMES

1. Procedures

- The appropriate size of the two electrical jackets on the body of the fencer is checked by the designated referees in the Call Room before presentation at the beginning of the bout/match.
- Please note that no protest against the size of the electrical jacket will be accepted on the piste once the fencers have left the call room.
- Chest protectors with the FIE logo will be accepted in the men's competitions.
- There will be a control that also under-plastrons are in accordance with the rules.

2. The fencers

- The fencers should deliver their fencing mask to the responsible volunteers in call room 40 minutes before the start of the scheduled bouts (T64-T32) of individual competition and no later than 50 minutes before the start of the scheduled match T8-T16 team events , in order to set up and test the LED wireless fencing signal system.
- The fencers/teams should appear in the call room 25 minutes before the start of the competition to check their equipment and install the wireless system (special T-shirt for foil and sabre and **finger pads for the epee**).
- After this check, the fencer must be absolutely ready to fence, in fencing uniform wearing his/her glove, with the body-wire connected to his weapon and with the wireless device.
- All zippers must be closed. The shoe-laces must be tied with care and socks according to the rules. Long hair must be tied in a secure way so as not to fall free at any time during the bout and to ensure a correct positioning of the mask on the head.
- The fencers should choose the weapon which she/he intends to use during the bout for the presentation. Change of weapons before the start will not be allowed.
- The fencers are requested to be present in the call room without extra gadgets or additional equipment outside the fencing equipment.

3. The following spare equipment and its quantity are mandatory in the fencing bag:

- 3 extra weapons
- 2 extra body wires
- 1 extra glove
- 1 extra conductive jacket with correct name printed on the back (foil & sabre)
- 1 extra fencing mask
- 2 extra mask wires (for foil & sabre)

4. Dress code for coaches

The coaches should be dressed in the tracksuit with long legs of their NOC. No T-shirts are allowed.
