

## Expiry date of the FIE homologation label

### To all concerned:

in response to numerous requests from different national federations as a result of various types of materials refused to controls, please note the following clarifications:

#### **CLOTHING:**

the FIE homologation mark is valid without expiration.

Currently on the FIE website it is **not present a list** of these materials or a list of manufacturers

#### **MASK, SABER GLOVE:**

the FIE homologation mark is valid without expiration.

Please check the website at the following section: <http://fie.org/fie/documents/equipment>

#### **BLADES:**

Please check the website at the following section: <http://fie.org/fie/documents/equipment>

The list is continuously updated.

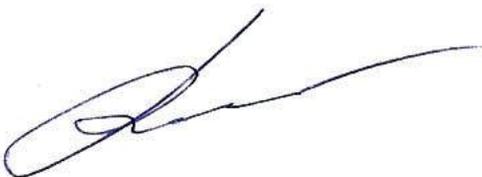

The blades that are on this list (and their possible cancellations) have to be accepted in the weapon control, (except, of course, that a blade will be rejected for encountered faults)

#### **SCREWLESS POINTS:**

the FIE homologation mark is valid without expiration.

Please check the website at the following section: <http://fie.org/fie/documents/equipment>

Lausanne, September 4, 2015

The President of the SEMI Commission  
(Semen Rikhtman)
