

## Modifications to technical book – 28.08.15

General comment: articles which are repetitions, out-of-date or not in fact rules have been deleted. The translation into English has been improved, taking care not to change the meaning of the French in any way. In places where the French is old-fashioned or awkward, it has been improved/simplified – again, taking care not to change any meaning. In particular, the future was systematically replaced by the present.
