

SUMMARY OF THE MODIFICATIONS OF ORGANIZATION RULES BOOK

The main changes that have been introduced are:

- General revision of the languages (French and English), to adopt more proper and uniform wording.
- Control of accurate consistency between French and English versions.
- Transfer of some articles within the book for a more logical sequence and to concentrate rules regarding certain items in a single chapter.
- Transfer of some items from Administration Rules or Technical book for consistency and from Organization book to Book of regulations (Cahier des charges); this part of the work shall be released later.
- Introduction of rules existing *de facto* but so far applied through letters or other FIE documents.
- Introduction of the rules regarding the Veterans Team World championships already in use, but not formally in the book. It must be noted that a proposal of modification of this section has been presented by the Veterans Council.

The resulting text indicates cancellations and additions in barred red and blue colours. The numbers of cross referred articles has been put in evidence with a yellow background , because they will be refined only after approval from Comex and Congress. The same concept is for the index and the list of subjects at the end, as well as the annexes.

Here below the list of modifications; simple corrections of wording or of the layout of the text are not mentioned:

o.44 and o.45	These articles bring into the book the rules for Team Veterans World Championships. Literally, this might appear as a modification of the book, that should be approved by the Congress, before adopting it. Nevertheless, these rules have been implicitly approved by FIE, reo years ago, when the team championship has been officially introduced in the program. Additional modifications of these rules shall be submitted to the attention of the Congress, but in our opinion rules already enforced can be present. In any event it appears suitable to emphasize this passage to the Congress when proposing the approval of the new text.
